PROFITABLE AND PLEASANT TRIP

Mr. J. D. McIntyre just returned from the Advance-Rumely Thresher company's dealer school at LaPorte. He states that he spent a most profitable and pleasant two weeks as the guest of the OilPull company. We will let him tell his own story:

On arriving at LaPorte, we registered and were assigned to rooms with private families in town giving a little touch of home life which only a stranger in a strange land knows how to appreciate.

The school was run much like a large university with regular lectures and laboratory classes running from 8:00 in the morning until 5:00 at night. Lectures were given by some of the best engineers in the automotive industry. After the lectures we would put on our "overalls" and go into the laboratory and work on the machines. There was an enthusiastic group of men working on motors, transmissions, running tractors, etc. We had altogether, some 250 dealers from all over the United States and Canada.

One man, a Mr. Rosenius, came all the way from Stockholm, Sweden, to attend the school. He represents a company in Stockholm which handles the Rumely Line in Scandinavia, Russia and Poland.

We made a trip through the entire plant, spending a half day in the OilPull and the same amount of time in the Separator factory. Believe me, it is a whole of a plant. The factory alone covers 85 acres and employs over 2,000 men. Everything is well organized and things sure do run through in a systematic, thorough way.

The spirit within the Advance-Rumely organization is another thing that impressed us. There is a strong sense of loyalty prevailing throughout the whole works which makes the organization seem like one big family.

Another instance of this spirit is shown in the Advance-Rumely club which is made up of the Rumely workers. They have a two-story brick building which they turned over to the dealers. We spent many pleasant hours in the writing room, reading room and billiard rooms, which were so kindly put at our disposal.

This club room was fitted up with a regular stage and everything. We had some great entertainment brought down from Chicago. One night we had the Imperial Quartet which makes records for the Victor company.

Another night we had a boxing entertainment. A regular vaudeville show from the best circuits in Chicago made a big hit. There was a cabaret girl who came down off the stage and kidded us. We will remember that quite a while.

The climax of the entertainment was the banquet given at the Masonic hall by the Rumely company as sort of a farewell party. Some "feed," I claim. During the meal we were entertained with music and a male orchestra from Chicago.

Mr. McIntyre is more enthusiastic than ever about the company and its product and states that he is now in a position to give a personal service to his customers that can't be beat.

BOYNE SCHOOL REPORT

Following are the results in the grammar examination, February 27:

Grade VI—Ben Herdman 90.16, Jean Bowie 89.8.

Grade V—Claude Lyman 65.

Grade IV—George Hutton 60.

MRS. WM. BOWIE,

Teacher.

Mrs. R. W. McClung (Nellie McClung), of Edmonton, is in Winnipeg, having been called to that city to attend the funeral of her mother, Mrs. Mooney.

See Buck & Howson's new stock of Men's Suits.

Magistrate Sanders, of Calgary, blames extravagant parents for youths found guilty of burglary.

For the ten months of the present fiscal year Canada's trade with Great Britain shows a considerable balance of \$357,500,000 and an unfavorable balance of \$230,300,000 with the United States, and with all countries a favorable balance amounting to \$263,600,000.

M. D. OF MARQUIS MEETING

The first regular meeting of the M. D. of Marquis, No. 157, was held on Saturday, March 6, 1920, at the Lake McGregor-School House, the following councillors being present: Sinclair, Dean, Rowe, Shore, Shouldice and Spanke.

The first business was the appointment of Donald Sinclair as Reeve and James Shouldice as Deputy-Reeve for the coming year.

By-law No. 17, pertaining to the restraining and regulating of animals at large was read for the third and last time and embodied in the by-law book of the municipality. Mr. Shouldice was appointed a delegate to attend the Municipal Hall Convention to be held in Calgary on the 17th inst.

The following townships were apportioned among the councillors for the purposes of road work: Shouldice, 20-22 and 20-23; Dean, 19-22 and 19-23; Shore, 19-21 and 20-21; Spanke, 17-21, 18-21 and 18-22; Rowe, 17-22 and 17-23; Sinclair, 18-23.

The following committees were appointed by the chair:

Cemetery—Shore and Rowe.

By-law—Dean and Spanke.

Finance—Shouldice, Dean and Sinclair.

health officer for 1920 at \$10 per month and \$1 per mile.

It was decided to pay the Zimmerman funeral expenses amounting to \$237.50. It was moved and carried to leave the relief and aid expenditure to the discretion of the Reeve and secretary-treasurer. Also that a by-law covering all aid and relief expenditures be drafted for presentation to the council.

1919 seed grain liens are to be renewed. Proposed that a brief synopsis of the Tax Recovery Act be placed in the Vulcan and Gleichen papers and that it be advertised as much as possible that by-law No. 17 has been passed and is in effect, covering the animals of non-residents as well as those of residents.

All schools will be paid all balances due on 1919 requisitions. There will be a by-law drafted covering the compulsory destruction of gophers, and in this connection it was decided to purchase 150 ounces of strychnine and 100 ounces of gophercide.

The pool hall at Milo will be licensed. It was decided to hold meetings on the first Saturday of each month and the next meeting will be held at the usual place on Saturday afternoon, April 3, at 2 p.m.

CHURCH NEWS

The Board of Managers of the Vulcan church will meet at the residence of Mr. Jennie John on Thursday, March 11, at 8 p.m.

The ladies interested in forming a Ladies' Aid Society in connection with the Vulcan church are requested to meet in the church on Friday afternoon at 3 p.m. A request is made that there be a good attendance.

The Sacrament of the Holy Communion was observed last Sunday morning.

In the evening the minister dealt with the three elements upon which life turns, namely: Work, God and Love. The minister pointed out that unless one made his work religious three-fourths of one's life was un-sanctified. The proof that work is religious is that Jesus worked. Since His time work has had a different meaning given to it.

The minister said that he knew of no man who had made a success of life who had left God out of his thoughts. Such men as Lloyd George, Abraham Lincoln, W. E. Gladstone knew the value of prayer and the tremendous force it is in moulding character.

The man who thinks he can get along without his fellowmen has not opened his eyes very much to life. The brotherhood of man is the outstanding necessary feature in the life of the individual as well as the nation.

Rev. John McNeil resigned from postorate of Westminster Presbyterian church, Toronto, after more than 35 years' service at head of the church.

Alberta in the year 1919 was fourth in the Dominion in the number of motor vehicle licenses issued. Ontario was first with 139,288, and Alberta issued 34,362.

Ladies Curling Club Dance Friday evening, March 12th. Harmony Five Orchestra. \$1.50 couple, extra ladies 50c. Supper Free.

Interesting figures were tabled in Ottawa last week with regards to unforeseen expenses for last year. Included in the total is the cost of the Prince of Wales' visit amounting to \$8,666.45, which appears a very small cost.

The Rebekahs Bazaar and Ball will be held on Friday, March 19th. The bazaar will open at 3 p.m. till 6 p.m., music will be provided. Dancing will start at 9 p.m. Harmony Five Orchestra.

I have for sale 50 head of wild horses and one registered Clydesdale stallion.—C. B. Shimp

Meet your friends at Buck & Howson's Opening, Saturday, March 13th.

One hundred and forty thousand automobiles were licensed in Ontario last year. It is estimated that the government will spend sixty million dollars on roads in that province during the next five years.

One million bushels of grain in the hands of Pouce Coupe farmers is held up for want of transportation. The sample and quality is very good and would make fine seed for this spring.

Don't forget the Dance given by the Ladies Curling Club on Friday, March 12th. Dancing starts at 9 o'clock. Harmony Five Orchestra.

Suits for all classes of Men at Buck & Howson's.

Dr. H. Mecklenburg, the well-known and long-experienced eye-sight specialist, of Edmonton, will be again at Vulcan (Hotel), on Tuesday, March 23, and Champion, March 24. You take no chances by consulting him if your eyes or glasses trouble you.

The funeral of James Earle House eleven-month old son of Mr. and Mrs. S. V. House, of Vancouver, B.C., whose death occurred February 28 was held on the afternoon of March 1. The Rev. A. W. Archibald officiated.

Mary MacLaren in "The Amazing Wife" was the offering at the Community Theatre on Saturday night last. The picture was one of the best which has been shown here and it was thoroughly enjoyed by all present. The management are doing their best to please the people of Vulcan and it is up to them to show a little more appreciation by their patronage. If there was no picture show here most people would be holding their heads off for one yet they are lax in their support when there is one here. Make an effort to attend Saturday night and take the whole family with you. Your presence will be appreciated.

LOMA NEWS

We congratulate Mr. and Mrs. C. G. Steiner on the birth of a daughter, born March 2nd, at the Morton Hospital.

The friends of Mr. E. Haniford will be pleased to hear that he has fully recovered from a severe attack of measles.

Mrs. C. H. Campbell and Mr. J. Phillips are on a business trip to High River.

Mr. Robert Smith has purchased Mr. P. Enzaure's farm, and no doubt will soon be settled in this vicinity.

Don't forget the Loma Dance on March 12th.

News has reached here from Cochran that one of our well-known friends of Red Cross District has had his knee put out of joint and so will not be able to attend our Loma Dance.

RESULTS OF COMMUNITY CLUB ACTIVITIES

Mr. D. MacIntosh, superintendent of the C.P.R. at Lethbridge, in answer to the Community Club's request for the installation of a telephone in the local station said the following:

"In respect to the installation of a telephone in the station at Vulcan: If the citizens of Vulcan or the Vulcan Community Club desire a telephone installed in the station, I am agreeable to them installing one for their convenience."

This was anything but satisfactory and Mr. Colwell was instructed to send a letter to Mr. J. M. Cameron, general superintendent at Calgary which contained the following:

"We submit this correspondence for your kind consideration, and in this connection might ask if it is usual or customary for the citizens of other towns situated similarly to Vulcan to be asked to pay for the installation and maintenance of a telephone in the railway station."

The attitude taken by Mr. MacIntosh in the matter cannot be a reflection of the attitude of the C.P.R. and it is hoped that Mr. Cameron will justify our beliefs by seeing that a telephone is installed at the earliest possible moment.

Mr. C. R. Rynock, president of the Lethbridge Board of Trade, has been invited to address the Vulcan Community Club at their luncheon to be held at the Imperial Hotel on the 19th inst. at 8:00 p.m.

REID HILL W. L.

The annual business meeting of the Reid Hill branch of the Women's Institute was held at the home of Mrs. Geo. Smith, on Wednesday, February 4. The following officers were elected for the year 1920:

President—Mrs. J. McKay.
1st Vice-Pres.—Mrs. W. E. Myres.
2nd Vice-Pres.—Mrs. J. Marshall.
3rd Vice-Pres.—Mrs. P. Myres.

Sec-Treas.—Mrs. O. Hickman.

Directors—Mrs. E. Army, Mrs. Hemmingway, Mrs. Viles, Miss F. Smith.

Auditors—Mrs. G. McKay and Mrs. Hawkins.

A hearty vote of thanks was tendered the retiring President, Mrs. G. McKay, also the retiring Secretary-Treasurer, Mrs. Hawkins, to which each responded.

Mrs. Jim Marshall was appointed official delegate to the annual convention which will be held at Edmonton in March.

The programme, which was short, in amount of business, consisted of a very helpful paper read by Miss Soby.

MRS. HICKMAN,
Secretary-Treasurer

COMMUNICATION

Vulcan Advocate,

Dear Sirs:

In your issue of February 25, I noticed that suggestions were solicited as to what a certain young man whose name was overburdened with C's could be seriously thinking about. The only suggestion we can offer is that he is thinking how to acquire more avoidupis.

A Student of Physical Culture.

COMMUNICATION

Vulcan, March 5th, 1920.

Editor Vulcan Advocate:

Dear Sir:—We are certainly in favor of trying the rain-maker, as I consider there is nothing impossible nowadays, and the sooner the people get together and employ this man Hatfield, the better, as it will benefit everyone alike. The potato crop as well as the wheat and oat crop will benefit. Every man in business will feel a benefit from this, and if there is any such a thing as making it rain, as this man guarantees to do, let no man say no. Let us try him out and see what he can do. We are heartily in favor of the rain man.

John A. Smith & Sons.

Let Collier oil your harness and be prepared for the wet season.

Wm. Thompson, of Vulcan, was fined \$1 and costs or ten days for permitting a hound to run at large.

PARTNERSHIP

All the residents of a town should be partners, not opponents. In all likelihood the more business done by your rival, the more you will do. Every merchant who treats his customers honestly and fairly will get his share and the more business that can be secured by united effort, the better it will be for all. When a town ceases to grow it commences to die, and the more people try to kill each other off in business and good name the more rapidly will utter ruin come to all. Stand together for the advancement of all.

The governors of McGill University have decided to part from tradition and select a Canadian instead of an Old Country professor as principal. This is real loyalty, and in the appointment we expect that there will not be anything sacrificed to loyalty.

Can you imagine an editor of Toronto, in a public speech, telling the people of Chicago that England is on her death bed. But, if we knew this editor—Lindsay Crawford—as Toronto knows him, the surprise would not be so great. He is one of those who have to their discredit the anti-British propaganda which of late has been somewhat overworked, even to the extent of creating an interest that has given to England's greatness even greater publicity and better understanding by the people than heretofore.

The law in Alberta which requires prints of butter offered for sale to weigh sixteen ounces net is being enforced and will hereafter be more strictly enforced. This is as it should be. There is nothing unfair in the butter maker in a regulation that gives protection to the purchaser. When one pays the price he should get the weight.

Dr. Scott, superintendent of schools in Calgary, has just returned from eastern Canada and the States, where he attended national educational conventions. His statement is that a standard form of education is the Canadian aim, and the preliminary step in this direction is the revision of textbooks. With the proposed standard system of education and a uniform system of national schools, Canada would be near to perfection in education.

The actual cost to Canada of the Prince of Wales' visit is just a little over eight thousand dollars. This statement from the government will be a fine answer to some of our more than democratic people who were making a howl about the spending of the people's money for the entertainment of royalty. The value of the Prince's visit to this country can hardly be reckoned in figures.

"I must say, and I presume it will not be well received here, that this province is over represented." This is the statement of Premier Stewart in the legislature, and no truer statement was ever made, and the application can be made elsewhere. We are too much governed in Canada, from the village council to the House of Commons and the latter is perhaps the worse. Think of the army of members which constitutes the governing bodies of eight million people.

There is a move being made in political circles in Canada, and particularly in the west, which is calculated to develop a general request that the electors do not commit themselves to the support of any party or candidate until such time as the policy and program of the Union government is presented for their consideration. This is not unreasonable, for it is a fact that opponents of the government have been busy for years in their criticism and attacks while the government has gone about its business of handling the greatest problems that has ever been placed upon any government in Canada. They have not taken the time to offer defence. It surely is little to ask that they be heard.

The world's largest boy, Lenny Mason, a young English lad of 16 years, who weighed 420 pounds, died recently from heart failure.

EDITORIAL COMMENT

Sir Edward Carson, the Ulster Unionist leader, in an address to the unionist council of Ulster, recommended that Ulster abandon its opposition to the Irish home rule bill and accept the bill now before parliament. And this is probably the action that will be taken by Ulstermen. The Daily Mail describes this as one of the most important developments in the Irish situation in many years. The fact that one section of Ireland is willing to accept the home rule bill will give to the British government a support that it has not had heretofore. The Sinn Fein element in Ireland is not disposed to accept anything that will give them less than entire domination in Ireland.

National railways in Canada, in a few years, will be a paying system, and that returns will help pay war debts, is the optimistic opinion of D. B. Hanna, president of the Canadian National Railways, expressed in a speech at the Canadian club at Ottawa. Even though all Canadians might not now share this optimism, everyone will hope that the highest anticipation might be realized.

The demand made by MacKenzie King in the House for an early Dominion general election does not appear to have any very general support from any quarters. While the Union government is perhaps assailed by several groups or parties, an election does not seem to create any decided confidence or hope of success for any of these.

Mary Pickford, the moving picture actress, following her recent divorce, has announced that she will not marry again, so that all might know just where Mary is at. But in Mary's profession there seems to be a penchant for much marrying, and, being a woman, Mary can hardly be denied the privilege of changing her mind.

The Canadian Chemical Journal has recently stated that, on account of the acute state of the food problem, we cannot much longer refuse to consider wood waste as a source of food. At that it might have its advantages over chewing the rag.

Premier Stewart has made the statement in the legislature that during the session of that body in 1921 the government would introduce proportional representation legislation and if the same were adopted by the House, the next general election in Alberta would be held under that system. Dr. Stanley, representative of High River constituency, expressed himself as being decidedly in favor of the system. The government is being urged to promote a campaign of education as to the working of this plan, and we give our support to this plan, for while the majority of people may have some idea of the scheme, the application and detail of proportional representation is well understood by very few.

The abolition of the Canadian Senate was the subject of discussion in the legislature last week, on a motion by W. M. Davidson that the legislature go on record as favoring the idea. The motion was lost, several voting against, more on the ground of being against interference with a federal question than any value they placed upon the Senate. This question of abolishing the Senate is perhaps nearly as old as the Senate itself, but it does seem that the attacks made upon it never come from the proper quarter to be really effective. To justify the existence of this body sometimes appears to be very difficult but the Senate remains apparently as old as the continent.

The committee on the by-laws in connection with the municipal council of Nanton has been considering the proposition of a by-law to close dance halls at one o'clock. This idea might not be received generally with favor, either at Nanton or elsewhere, nevertheless it would be a great advantage to have dances commence earlier and end earlier than has been the practice. Dancers and dance promoters could introduce the change without the necessity of a by-law and it would be to them a credit as well as an advantage. This could apply also to other functions that are held after night.

The Marquis of Queensbury is again before the bankruptcy court. This is the fourth failure, and in his public examination he indicated it was due to funds owing to an exploit in Canadian oil and mineral properties. When he was in Canada in December, 1918, his wife cabled him \$7,500 to buy, but declined to advance a further \$10,000. Consequently he was stranded and cabled his friend, Bob Sliver, who furnished \$1,500 to enable him to return.

London's public works department is making preparations to cope with the floods which are soon expected.

USE GOOD BUTTER WRAPPERS

Farmers are warned to be careful as to the size of prints which they are putting on the market. The law regarding short weight print is going to be enforced and some convictions have already been secured against retailers who had prints on sale which did not contain the full 16 ounces of butter. Jobbers claim that a very large proportion of the butter they receive from shippers show the prints of short weight. This means that the butter has all to be re-handled to bring the butter up to the required pound prints. This means a lower price for the butter maker, for there is the cost of working, the wrapper, and the waste to be deducted from the selling price. Leave your order at this office and thus make certain of receiving properly printed butter wrappers.

OUR NATIONAL PROBLEMS

The Hon. T. A. Crerar, M.P., in his address to the farmers of Alberta at the recent annual U.F.A. convention, at Calgary, gave his viewpoint on some of the outstanding national problems which confronts Canadians which makes excellent reading. Unfortunately we have not the space for his address, but we herewith reproduce his views on two important questions.

What is protection? It is nothing more or less than the power of the state used through the agency of the law to make it difficult for goods to come into a country, consequently conferring a special privilege on the person within the country who manufactures such goods. That is what is meant by protection. The argument supporting it is that we must build up home industries and in order to encourage home industries erect a tariff wall and make it difficult to come in and the more difficult you make it for goods to come in the more easy it is for your home industry to develop.

If that is not a logical sound argument, why not carry it to a logical conclusion? If it is a good thing to raise barriers against goods coming into the country in order that we may encourage and build up home industries, would it not be a better thing to keep the goods out of the country altogether and raise our tariff wall so high that nothing whatever could come in? The home manufacturer then certainly would enjoy a complete control of his home market because no goods could come in. (Applause). This is clear. But if we brought about that condition of affairs what would be the next result? If we brought no goods into the country no goods would go out of the country. That follows inevitably, because in the great business of international trade, goods are paid for with goods; there is nothing clearer than that.

Suppose we are sending goods out of the country, our wheat and our bacon and beef and cheese and whatever manufactured products we have, such as pulp wood and paper and anything else we produce, how are we going to be paid for them? Will they be paid for in gold? They might if the country to which we are sending them has the gold—but we could store up a lot of gold and would be willing to pay in gold what could we do with it? It would not do us any good. We could fill our public buildings with it; but that would not help to clothe and feed, and keep us, and consequently one of the most elementary things in economics that cannot be controverted is that goods must be paid for with goods.

But there is still another aspect of it. We are asked this question: "If we do away with the protective tariff, how are we going to make up the public revenue?" Well, last year, the year ending 31st March last, this country got from customs revenue about one hundred and fifty million dollars. The finance minister, in the slight changes brought about in the budget last year, estimated as a result of decrease in business and of these changes, that there would be a considerable falling off for the present year in the revenue under the customs tariff. I noticed in the newspapers a few days ago a statement from Ottawa to the effect that the amount of customs tariff collected this year will exceed that of last year, so that the people of Canada have paid more this year than they ever paid before in taxes through the customs.

Now, I maintain that it is a matter of vital importance to the citizens of a country how their public revenues are raised. It is not a question—I have said this before and I say it again—it is not a question so much as the amount of taxes you raise in a country as the manner you raise them, and if you study the record of the past; you will find that some of the greatest revolutions in all history have been caused by the manner in which taxes have been levied upon the people. (Hear, hear). How have we raised our revenues in the past?

There are few of us that imagine, for instance when we have gone into the merchant's store and bought a pair of shoes, that we have contributed by that very act possibly some two or three or four dollars of the price on the shoes—and goodness knows they are high enough these days—to the public revenue of the country through the customs tariff. Do you realize that when you buy a suit of clothes you have been taxed 35 per cent on it? If you are buying goods that have been imported, you pay it indirectly into the public treasury, but if you are buying goods which have been made from cloth manufactured in Canada, well, it goes into the manufacturer's pocket; that is the difference. (Applause).

Fresh air, sunshine and moderate exercise will break up almost anything but a happy home, and it is good for that.

Sale of Well Known Ranch

(From High River Times)

Guy Weadick, known from east to west on this continent, promises to add to the immense publicity given to High River by the purchase of a ranch by the Prince of Wales. The medium is the same—the purchase of a ranch—but the use of the ranch will be quite different.

Guy Weadick, and his wife, known professionally as Grace Le Due, are world celebrities as expert cowboy and wild-west performers, and to those who know them not in stampee spectacles they are well known as vaudeville performers, who have carried to the east and the places far distant from the prairies the idea of the life, work and sports of the wild west by such demonstration as can be given on the stage. Mr. Weadick has to his credit the management of the greatest and most successful stampee enterprises ever undertaken, included in which are those that have been held at Calgary, Winnipeg and New York.

Coming last week from New York almost direct to High River, with a definite plan, Mr. Weadick has purchased from Mr. Fred Kuch his ranch to the west of High River. The property is an excellent one, very beautifully situated in the fork of Flat Creek and the north fork of Highwood River, the land bordering on the waters of both streams. This spot is not far distant from the Prince of Wales' ranch, being only eleven miles away, and the proximity might have its advantages.

Authentic details have not yet been given out for publication, but the plan is, so far as can be learned, to establish a rendezvous in such a location and with the equipment and natural surroundings as will afford patrons the experience and pleasure of a bit of the "real thing" in "wild west." This retreat is calculated to provide a somewhat different holiday for those who have the price to pay, and the inclination to do what they like when they like, and how they like, unencumbered by the formalities which obtain at fashionable resorts. They may go fishing, go hunting, swim in the rivers, sleep late or rise early, and if they like, camp on the prairie or the mountains for a night or a week, and if fancy suggests, take a ride or climb the mountains; dress, eat and act, directed only by inclination.

This enterprise is by no means one of small proportion, for it is to be fashioned after and conducted in a like manner to that of an institution of the kind in Wyoming, which has so prospered as to yield a fine return to the proprietors.

The interest and connection that High River will have in this new undertaking is considerable. High River will be the closest point of rail connection with this "wild west" resort, and the going and coming of tourists and other benefits of the enterprise cannot but be an advantage to the town.

We are presuming that it is likely that this point will also be the place of training and assembly of the animals, equipment and performers for the vaudeville acts and wild-west shows, which are from time to time promoted by Mr. Weadick.

CLYDESDALES ARRIVE

Six Clydesdale stallions arrived at High River from Scotland on Wednesday morning for A. D. Dollar. Three of these are six-year-olds, all bred by the famous Clydesdale breeder, Mr. J. E. Kerr, of Harviestoun, Dollar, Scotland, out of three of his best mares.

Scotland's General, sired by Scotland's Victor, dam Rosedew, by Baron's Pride; grand dam, the one thousand and guinea mare, Queen of the Roses, by the three thousand guinea stallion, Pride of Albion, out of the champion mare, Moss Rose. Scotland's General had the East Lothian premium in 1917 and 1919, and the Alnwick premium in 1919.

Scotland's Admiral is also by Scotland's Victor, out of this great breeding and show mare, Lady Garnet, by Baron's Pride. Admiral has lots of size and quality and has also been a popular premium horse in Scotland. He held the Lauderdale premium in 1918 and Hexham in 1919.

A great massive, upstanding horse is Erin's Favorite, sired by one of Scotland's best sires, Royal Favorite, and his dam is Cleopatra, by the famous Cawder cup champion, Hiawatha. A four-year-old is by Union Jack, out of Jean Reid, by the \$9,500 horse, Baron of Buchlyvie.

Two three-year-olds complete the shipment. Burgie's Last, by the Baron of Buchlyvie horse, Baron of Burgie, is a very stylish colt, full of the Clydesdale character and a show-ring prospect. The others, Scotland's Attraction, is well named, as he is a thick and attractive colt, full of qual-

ity. He is sired by Scotland's Bluebell, imported by Mr. Dollar two years ago, and now at the head of Mr. W. H. Bryce's stud at Downe Lodge, Arco, possibly the largest stud in Canada. The dam of Scotland's Attraction was by the Cawder cup champion, Scotland Yet.

These horses had a very rough sea voyage and were five weeks en route from Glasgow to High River, but with all they came through in good shape under the care and management of John Findlay Wood.

PROVINCIAL AND GENERAL

Newspapers in Winnipeg, on Thursday, published an announcement that owing to the continued shortage of newsprint they are obliged "until further notice" to discontinue the publication of advertising, this step being taken to ensure as far as possible an uninterrupted news service.

Calgary police force plan a campaign against auto speeders and traffic by-law breakers, and it may be expected that the example will be followed by the police throughout the province. There are four C.P.R. employees in the municipal council in Revelstoke, two engineers and two conductors.

Sir John Reese's observation in the British House, anticipating a reply by Lady Astor, that he knew "there was a rod in pickle for him, but that he was prepared to kiss the rod," indicates a surprising livening up of things in the most venerable of parliaments. It is also an answer to those who said that when women went into politics gallantry would cease.

The police of seven Canadian cities are frantically searching for "Captain R. M. Cole" of the "Military Hospitals Commission of Canada," reputed to be one of the cleverest forgers in the annals of police history, and who is charged with victimizing a number

of Calgary hotels, grocery stores and eating houses to the extent of nearly \$1,000, making a clean getaway.

"How do you tell the date of Easter?" is asked. Generally, to be candid, by looking at the calendar. Another way is to remember that Easter is the first Sunday after the full moon which happens upon or next after the 21st of March, and if the full moon happens on a Sunday, Easter Day is the Sunday after. This year Easter Sunday falls on April 4.

Figures wired out of Toronto place the cost of the late provincial election at \$1,250,000. This is a big increase on 1905, the last election held under control of the Grits, when the cost was \$85,000. And even the present figure of a million and a quarter would be further swollen, if the government adds ordinary bank interest for the long period it has held back payment of the election accounts.—Ex.

The executive committee of the National Liberal Association has decided to institute the publication of a weekly comment upon parliamentary proceedings under the editorial direction of Mr. John Lewis. It is also planned to have a record of these proceedings, including resolutions, divisions and the progress of important legislation, which may be useful for reference. The form and manner of publication are under consideration.

Customs receipts for the eleven months of the present fiscal year totalled \$166,527,100, while last year they were \$143,564,204. For February alone the increase was \$3,481,688.

SERVICE

SERVICE

WHEN you buy a tractor you want first, the most efficient, dependable and economical tractor on the market. Second, you want to be sure of a personal service from your dealer that means something. For what good is the very best tractor to you if you don't thoroughly know how it works and how to keep it working?

I went to the Advance-Rumely Dealers School at LaPorte, Indiana, where the famous OilPull Tractor is built for the express purpose of putting myself in a position to give you such service. I was privileged to attend this two weeks course in company with some 250 other dealers selected by the Advance-Rumely Thresher Company.

During the two weeks we worked, and worked hard. We learned the tractor thoroughly—not from books—but by stripping it down and assembling it again. We worked on the motor, transmission—the cooling, ignition and lubrication systems—in fact every part of the machine.

And they put the "cards on the table" there at LaPorte. We were allowed, and

urged, to look into every branch of the factory—no department was closed to us—nothing was kept from us. We saw the whole inside workings. The bigness of it impressed me—the machine shop alone is 800 feet long—but more than that was the systematic way things are organized and the thoroughness with which the goods are manufactured, inspected and tested. One of the machines, a cylinder grinder, is the only machine of its kind in the country. The OilPull cylinders and pistons you know, are ground to within 1-1000 of an inch.

I was pretty well satisfied before I went down to LaPorte that the materials and workmanship that went into the OilPull were the best that went into any tractor—now I am SURE of it.

In the Rumely OilPull Tractor I am not only selling absolutely the most efficient, dependable and economical tractor on the market—and guaranteed, remember—but I am backing it with a personal service that means something.

HIGH RIVER PRESBYTERY

(From High River Times)
The semi-annual meeting of the
Presbytery of High River was held in
Chalmers Church, High River, on Tues-
day, February 24. Most of the mem-
bers were in attendance. Many mat-
ters of importance to the various
mission fields were dealt with, among
others the Foothills mission. The
Presbytery is of the opinion that the
experiment undertaken when Mr.
Mathews was appointed to the field
has been justified, and believes that it
is warranted in seeking the extension
of such work, and the restriction of
the field now being covered by Mr.
Mathews alone. In other words if it
is possible to get another man, to di-
vide the territory, giving one portion
of it to Mr. Mathews and the other to
the new appointee.

Rev. R. B. Ferris, of Granum, and
Rev. W. J. Kidd, of Okotoks, were ap-
pointed commissioners to the general
assembly meeting in Ottawa in June,
together with the representative el-
der from Okotoks and Vulcan.

Dr. Ferguson gave a very interest-
ing and instructive report of the con-
ferences which he attended in British
Columbia between some of the lead-
ers of the Presbyterian church and
the Anglican bishops of B. C. looking
toward church union.

Remits from the general assembly
to the various Presbyteries through-
out the Dominion re "The Settlement
of Ministers," and "The limit term of
office of the eldership," were consid-
ered and with slight modifications ap-
proved.

Standing committees for the ensu-
ing year were appointed as follows:

Home Missions—W. McNichol, A.
MacWilliams, and H. Johnston.

Foreign Missions—A. E. Hayes, W.
B. Mahon, and R. A. Macleod.

Sunday Schools and Y.P. Societies—
R. B. Ferris, W. J. Kidd, and T.
Rammage.

Colleges—A. MacWilliams, W. Mc-
Nichol, and W. J. Kidd.

Aged and Infirm Ministers—A. J.
Mitchell, A. E. Hayes, and R. Gehman.

Widows and Orphans' Fund—A. J.
Mitchell, A. E. Hayes, and R. Geh-
man.

Budget—W. J. Kidd, A. MacWil-
liams, and W. McNichol.

Forward Movement—A. J. Mitchell,
W. B. Mahon, R. B. Ferris, and E.
Carr.

Statistics—W. McNichol.

Reports on the Budget, Home Mis-
sions, and on Sunday schools were
read and approved and ordered trans-
mitted to assembly's conveners. Some
conveners were not ready to report.

The Social Service League and the
question of the referendum was con-
sidered, and Presbytery appointed a
strong committee to assist in the
work of the Social Service League,
and make preparation for the prepa-
ration for the referendum about to
be submitted to the people. It was
also agreed that at least one service
be given to a presentation of the facts
relative to the working of the liquor
law of this province since it was placed
upon the statutes.

It was agreed that the thank offer-
ing in connection with the Forward
Movement be taken in the Mission
fields of our Presbytery between Sep-
tember 15 and October 30, 1920.

Hereafter all billing of members
of Presbytery in connection with the
regular meetings of Presbytery shall
cease.

HOW TO GET IT

"How can I go about to get a drink
in this town?" asked a recently-arrived
guest, who looked as if he needed
irrigation. "Well," replied the land-
lord of the tavern, "I'll tell you what
you might do: Go to the second cor-
ner up the street, pass around it and
to the alley; go down the alley about
half-way and you'll come to a gate
standing open, a crack in a fence made
out of old billboard lumber. Go in
through the gate and along to a cell-
ar back of the shanty standing in the
lot, lift the cellar door and go down
the steps, whistle three times, and a
dirty old fellow will come out with a
lantern, and look you over, and tell
you that there ain't nothin' doing in
this dod-blasted town since the blank-
ety-blanked Prohibitionists got so siz-
zle-fired active. That is the best I can
do for you, Mr. Dryer.

All able-bodied citizens of Italy be-
tween the ages of 20 and 65 would be
required to work by the provisions of
a bill introduced in parliament by
Giovanni Lombardi, Independent So-
cialist deputy, who calls the measure
a "tax on laziness." Persons able to
work are subjected to heavy levies
under the provisions of the bill. Mon-
ey acquired from this source would be
used to maintain those unable to work
and keep up agricultural colonies to
which able-bodied persons who fail to
work would be sent.

LADIES SHOULD DEFEY FASHION

The immediacy of dress on the part
of our society (?) women comes in
for some hard knocks. Here is one
from the Port Hope Times: "When
the fashions of the day are so utterly
wild if not immodest, it is a matter
of surprise to many why sensible
nice women try so hard to follow
them. If we would cultivate more in-
dividuality and not, like a lot of
sheep, follow the lead of some society
leaders, I am sure many women
would dress more becomingly, in
quiet, sensible garments and defy the
fashions."

A resolution calling on the Federal
government to hold a referendum on
the liquor question in Manitoba has
been drawn and will be submitted to
the legislature at an early date. The
means the elimination of inter-provin-
cial liquor traffic, if the result of the
referendum is in favor of total prohi-
bition. The referendum will be held
on the Federal voting list.

Jail sentences without the option of
a fine for persons convicted of viola-
tion of the Manitoba Temperance
Act, which is the recommendation of
the chief license inspector in his an-
nual report, is announced as one of
the provisions to be introduced in the
bill amending the act which awaits

second reading by the legislature. It
is stated that another amendment will
make it a crime for anyone to sell
prescriptions given by a physician.

ODD FELLOWS' HOME

The special committee appointed to
consider the question of establishing
an Odd Fellows' home for aged mem-
bers and orphans, was presented to
the grand lodge in annual session at
Calgary. R. J. Parker introduced a
motion, putting the grand lodge on
record as favoring the proposition,
and that the scheme be carried out at
once. The motion was seconded by J.
Stewart and was carried.

NEED OF MORE ACCREDITED HERDS IN ALBERTA

(By C. A. Gardner).

While attending the Alberta Dairy convention held in Edmonton recently the fact of tuberculosis among dairy cows was very forcibly and indelibly printed on my mind.

We, as dairy and stockmen, should wake up to the fact that we are our brother's keeper in this matter and work out some solution to rid our herds of this disease.

We don't realize the harm milk from tubercular cows will do to the human family.

A young calf from a dam or sire affected with tuberculosis is not affected with the disease at birth, but if allowed to take milk from its tubercular mother it will also become affected. This has been proven by taking several calves that were free from tuberculosis and placing them in a clean paddock and feeding them milk from cows affected with the disease. After a few weeks' test the calves all proved to be affected the same as their mothers. There is no reason why the human family will not contract tuberculosis through the consumption of this product from the cow. As a rule, all butter, cream and milk is consumed in the raw state, so therefore, if affected with the tubercular germ, the human family is liable to contract the disease.

Not many weeks ago one herd of 16 dairy cows, a few miles out of the city of Calgary, was tested for tuberculosis and out of the 16, 14 were found to be tubercular. The milk from this herd was being consumed by innocent children and grown-ups who were unaware of the disaster it might bring to them.

I might say that there is far more danger of becoming diseased through the consumption of the milk than the consumption of the meat of a tubercular animal as the tremendous heat while cooking destroys the germ.

The experimental farm at Strathmore, east of Calgary, has the nearest accredited herd in Alberta, and I believe Dr. Thom. Hayes, of Carstairs is second.

Farmers contemplating going in for dairy farming would do well to buy cows tested for tuberculosis and have the test made before you purchase with the understanding that if you have a reaction in sixty days you are to be remunerated for the loss.

What is the solution to rid our dairy herds of this dreaded disease? The government will make the test for anyone desirous of ridding their herds of the disease by applying to the Veterinary Director-General, Ottawa. A form will be sent to fill in and returned to Ottawa and a government veterinary will be instructed to test your cows, free of charge I am informed, but you must furnish the necessary transportation between the railway station and your farm during the test.

While the convention was in session a resolution was passed to have the disease stamped out in five years. At present there are a number of breeders who are taking steps to have their herds placed on the accredited list. There is some advantage in having our herds put on the accredited list as from such a herd may be shipped males or females to any part of the U.S.A., or anywhere without a tubercular test. No cattle, beef or dairy cows are allowed to cross the line in or out of Canada today without first passing the tubercular test, unless from accredited herds. If your herds are on the accredited list, a certificate that the animals are from an accredited herd will be accepted in place of a tubercular test certificate, thus getting rid of the delay and the uncertainty of special test for the export trade.

A list of accredited herds will be issued from time to time by the Health of Animals branch of the Department of Agriculture. Persons desiring to buy cattle free from tuberculosis will do well to buy from a herd known to be free from the disease. For the past three months I have been trying to purchase purebred cows free from tuberculosis, but find it hard to locate such cows with a guarantee with them. Milk and all products produced from an accredited herd can be freely consumed without danger of infection.

In the United States today the accredited herd is in evidence, hundreds of herds are on the accredited list and those who own such herds have considerable advantage over their competitors who are not so fortunate as to be on such a list. Why not we in Canada line up with this system? If we follow up testing our herds and they have passed two annual or three semi-annual tests without a reaction in the herd, your herd will be placed on the accredited list. Certificates will be granted to accredited herds enabling the owner to ship to all parts of the United States or Canada without testing for tuberculosis.

There will be some compensation

paid the man who has an animal affected so that it must be destroyed. For such information write to the Department Veterinary Director-General, Ottawa.

Shall we get our herds on the accredited list?

ALBERTA-HUDSON BAY RY.

There was a brief discussion over the bill introduced by R. E. Campbell (opposition) Rocky Mountain, to amend the act relative to the charter of the Alberta Hudson Bay Railway Co. providing that the construction of those portions of the railway already authorized and not completed, shall be commenced within three years, and shall be completed within five years from the coming into force of this act and section 14 of the act of incorporation and the amendments thereto are hereby amended accordingly.

Captain Campbell is only the nominal introducer of the bill, and said that it would be explained fully in committee. He said it applied to the proposed road known originally as the High River and Hudson Bay.

James Weir (non-partisan) Nanton, said he had been informed that the people in London behind the railway now had the money ready to proceed with construction.

W. M. Davidson (government) North Calgary, objected to the consideration of any railway legislation before the house fitted in with the general railway development throughout the country. The time was past for free trade in railway charters.

Hon. C. R. Mitchell, provincial treasurer, said that he was under the impression that one of the branches of this proposed line was the one which had been projected from Milk River to Medicine Hat, that a large number of farmers had been induced to buy stock in the railway and now wanted an accounting, but he wanted some information on the subject.

High River citizens are identified with this charter and Mr. Crandle is at present in England in connection with business relating to this road and is expected home next month with definite plans as to construction work.

SILAGE FROM SUNFLOWERS IS BEST FOR COWS

More milk of better quality was produced from cows fed on sunflower silage at the C.P.R. farm at Strathmore than was received from them when fed on either corn or peas and oats.

Prof. Geo. H. Hutton, head of the animal husbandry branch of the C.P.R. department of natural resources has been advocating silage as a solution of the feed troubles of the dairy farmers of the province for a number of years. Two years ago he told the dairymen at Calgary of the advantages of feeding silage composed of peas and oats. Last season he experimented at the C.P.R. farm on sunflower silage and the following are the results of two weeks' tests duration made with 40 head of Holstein cows, the figures being taken days of each period, the animals being fed 30 pounds of silage a day:

Silage	Lbs. Milk	Test
Sunflowers	27.6	3.6
Peas-Oats	25.88	3.1
Corn	26.4	3.4

Not only was the daily production of milk greater and of better quality but the cows showed a daily gain in weight of 2 pounds when on the sunflower diet, but gained only 0.1 pounds on peas and oats, and 1.85 on corn.

During the week Mr. Hutton invited a number of the prominent breeders, dairy farmers, business men and newspaper representatives down to the Strathmore farm where they got all the information which Mr. Hutton had been able to obtain as a result of the careful investigations he had made into the question of silage.

On irrigated land on the farm they had secured the following yields: Sunflowers, 34.6 tons; corn, 14 tons; peas and oats, 7 tons. Mr. Hutton said there was no portion of Alberta which would not produce one or all of these silage crops and yields of from 14 to 30 tons of sunflowers had been obtained over widely scattered areas last year.

It was stated at the recent dairy convention at Edmonton that small silos, 36x16 feet, which would have a capacity sufficient to meet the ordinary small farm, could be built for about \$500 and that the provincial government was willing to give information on the subject.

All those who had the pleasure of visiting the Strathmore farm feel that the stockmen and dairy farmers of the west are indeed indebted to Professor Hutton for the very thorough manner in which the tests have been conducted and the definite information which is now available on this very important matter of winter feeding.

More than \$27,000,000 of pelts were sold at the 12-day St. Louis fur auction.

The Laying Hen at Poultry Show

In our last week's issue we referred to the "Laying Hen" class at the Poultry Show and now submit the score cards of the pens judged. As these pens represent the average condition of the flocks in the district the visit of the Poultry Inspector has been well timed so that breeding pens may be made up that will produce better egg producers than the average shows. Each hen judged had 5 points as par value. For obvious reasons only the names of the owners of the three winning pens are mentioned.

MARKET EXAMINER'S MARKET REVIEW

CATTLE

On the comparatively small number of choice steers which came into the Calgary yards this week, there was a good market, and with the improved quality and a little better demand the top prices are advanced to \$12.85. Except on the choice steers, and the tops of the good butcher cattle, there is very little movement, and the steers below this class are being taken out as feeders at from \$10.50 down. Choice steers, \$11.35 to \$12.85 and good butchers \$10.00 to \$11.25. There were very few beef cows in the shipments, and some of them went up to \$10.00, with a range down to \$9.00, and good butchers, \$7.50 to \$8.75. Occasionally, there are choice light veal calves which made from \$10.00 to \$11.00. Bulls scarce, and the best at \$8.00. Feeder steers from \$10.50 down, and stockers from \$9.00 down; stocker heifers, from \$8.00 down, and cows, half a dollar under.

Local packers are operating freely in the Edmonton yards and for the good steers are paying as high as \$12.75, but there are for the choice

grain-fed steers; choice heifers and cows are also in demand and the choice heifers bring as high as \$11.25; choice cows \$10.50. These cattle are scarce and the bulk of the sales are far below these prices. There is a fair stocker demand both from B.C. and northern Alberta points, feeders are being taken out at from \$9.50 down and stockers from \$7 to \$8. Unfavorable weather conditions and the uncertainty regarding feed is holding back the demand for the stocker cattle.

HOGS

Prices on the few loads which came on the market early were around \$19, but on Thursday the price advanced to \$19.75. Not many on hand this morning, and the price was \$20.

Edmonton hog market was firm during the opening and has been gaining in strength and on Thursday the sales were made on the basis of \$19.75 for selects.

SHEEP

Receipts of sheep of butcher quality in Calgary yards during this week have been light. Good lambs would probably bring from \$17 down; wethers, \$12.50 down; ewes at a wide range of prices.

Butcher sheep have not been offered to any extent at the Edmonton yards and the only movement was a load of common breeding ewes shipped south.

HORSES

Auctions during the week have been fairly well attended, and prices are about the same as a week ago. There are few teams of the best quality being offered, and top prices do not exceed \$475. Movement is continuing to Saskatchewan, Manitoba and B.C., with some loads to Alberta points.

PRODUCE

Eggs have been fluctuating considerably since last issue, and there was a drop to \$13.50, but there has been some recovery and quotations now are from \$13.50 to \$16.50, with only a few at the latter price; cold weather has checked receipts which were starting freely last Saturday and Monday. Butter prices are unchanged, creamery stocks in the east were sold for American shipment. Dairy of good quality in demand, and a wide spread on straight receipts. Steps are being taken to see that all prints offered for sale are of full 16-ounce weight, and some retailers have been fined for having prints under weight in their possession. Potatoes are held back by bad weather; country point price around \$65. Very little poultry arriving, and prices continue firm.

HAY

Bad weather has caused a still greater demand for feed, and prices are higher on hay and green feed, and feed of any kind hard to get. Dealers paying from \$30 to \$35 for hay at near-by points. Green feed on cars at shipping points is worth from \$26 down, this last price being offered for feed out of the stack. Shippers who had contracts to fill in northern districts find they have to reduce the shipments, owing to large amounts required for home use.

HIDES

Market unchanged, but the tone continues unsettled.

FURS

Nothing new in the market and prices unchanged. Coyotes look as though they might go still lower and best skins not worth over \$15.

A LEGAL FENCE

After a long and wordy argument the house sitting as a committee of the whole on Wednesday again restored the clause in the new Consolidated Animals Act providing that before a fence around a crop being harvested can be termed legal, the crop must be at least eight feet from the fence. J. A. McColl, (government), Acadia, put up the principal argument for this limitation which was heatedly opposed by J. H. Kemmis, (opposition), Pincher Creek.

Government Clyde Stallion

Parties wishing to breed mares to the Clydesdale stallion purchased by the Alberta Department of Agriculture, "Craigie Masterpiece" 18297, during the season of 1920, will make application to S. G. Carlyle, Live Stock Commissioner, Department of Agriculture, Edmonton, giving name and registration number of mares. A fee of \$25 will be payable at time of service, and a further fee to be fixed by the Clydesdale Committee and the Live Stock Commissioner, will be payable when mare proves to be in foal. The location of the horse in the province will also be decided by this committee, and arrangements will be made that the service fees in every case will cover the freight so as to equalize cost to parties residing in different parts of the province. Further particulars will be published shortly, but parties desiring to breed mares should make application at once. The stallion will likely be ready to begin the season about May 1st. The Committee and Live Stock Commissioner reserve the right to revise the list of applications and make such rules and regulations as may be deemed necessary regarding the services of this stallion.

S. G. CARLYLE,
Live Stock Commissioner.

M11x2.

Calgary house rentals will increase from \$5 to \$10 a month on April 1.

The Alpine Club of Canada will camp this year near Mount Assiniboine from July 20 to 31.

The mayor of the city of Moose Jaw has been fined for assaulting one of the aldermen. Evidently they have some stiff arguments in that city municipal body.

If you wish to regain failing health why not consult T. E. Davis, Chiropractor, at once. Palmer School graduate. His office is at the King George Hotel, Blackie.

LEATHER

is too high a price for you to neglect your harness. Bring in your old

HARNESS

and let me repair and

OIL

them for you. Harness oil in bulk for sale. The best oil at the lowest price.
